1. India-US Working Group on Education and Skill Development virtually launched (May 23, 2023)

India-US-Working

The **Ministry of Education, Government** of India and US Department of State on 22 May launched the **India-US Working Group on Education and Skill Development** in virtual mode.

An overview of the news

- Its aim is **to enhance cooperation and collaboration between the two countries** in the field of education and skill development.
- Both sides acknowledged the importance of **skilling and vocational education** in an industry-centric era.
- Recognizing the need to align skill training programs with industry requirements, both sides agreed to promote partnerships between educational institutions, industry stakeholders and relevant government agencies.
- The collaboration aims to bridge the skill gap, increase employability and promote entrepreneurship in both the countries.
- The delegations from both sides expressed their commitment **to strengthen cooperation in education and skill development between India and the United States.**
- The establishment of an India-US Working Group on Education and Skill Development was **announced during the 2+2 Ministerial Dialogue** held between India and the US in **Washington DC** in April 2022.

Topic of discussion

- Skilling and vocational education
- Certification and recognition
- Matchmaking between U.S. and Indian higher educational institutions
- Engaging with the Private Sector

2. WHO warns of possible rise in dengue cases in Afghanistan (May 23, 2023)

dengue-cases-in-Afghanistan

The **World Health Organization (WHO)** has **issued an alert** on the recent cases of **dengue fever in Afghanistan.**

An overview of the news

- The organization said that their medical staff has enough equipment to control the disease.

- The organization said that the **number of dengue patients may increase during the rainy season**. Twelve groups of **65 women health professionals** are participating in the three-day program to protect against dengue patients.
- The WHO also urged the people of Afghanistan to avoid mosquito bites and adopt necessary safety measures to prevent dengue.

What is Dengue?

- Commonly known as **break bone fever**, it is a flu-like illness caused by the **dengue virus**.
- It occurs when an Aedes mosquito carrying the virus bites a healthy person.
- The disease is mainly found in tropical and sub-tropical regions of the world.

Causes of Dengue

- It is caused due to four viruses, namely - **DENV-1, DENV-2, DENV-3, and DENV-4**.
- The virus enters the mosquito when it bites an already infected person.
- The disease is transmitted when it bites a healthy person, and the virus is spread through the person's bloodstream.

Symptoms of Dengue

- Headache, Muscle, bone and joint pain, Nausea, Vomiting, swollen glands, Rash.

Treatment

- There is no specific treatment for dengue.
- Early detection of severe dengue-associated illness and access to appropriate medical care reduce deaths from severe dengue.
- Diagnosis of dengue infection is done with a blood test.
