4. RBI slaps ₹2,000 crore fine on major Indian PSUs for delayed reporting of overseas investments (Aug. 4, 2023)

The Reserve Bank of India (RBI) has imposed penalties on four major Indian public sector undertakings for delayed reporting of their overseas investments.

An Overview of the News

- The companies that have been fined by RBI include ONGC Videsh Limited, Indian Oil Corporation Limited, GAIL (India) Limited and Oil India Limited and the total amount of fine imposed by RBI is ₹2,000 crore.
- Delayed reporting of overseas investments has led to restrictive measures by RBI, affecting further remittances and transfers till discrepancies are resolved.
- One of the regulatory measures taken by RBI is to stop outward remittances. Authorised Dealer banks have been instructed not to facilitate any outward remittances or financial commitments by persons resident in India to foreign entities till the reporting issues are regularised.
- Penalties for late submission have been imposed retrospectively, covering a significant number of overseas direct investment (ODI) remittances processed since 2000. The companies involved, including SBI, have reported all ODIs on the basis of documents provided by the remittance companies.
- In an effort to prevent operational disruptions and comply with RBI regulations, the affected companies have sought an extension from the central bank. They aim to resolve late deposit charges with SBI ODI (Overseas Direct Investment) cell.

5. SpaceX launches 'Jupiter 3', world's largest private communication satellite (July 28, 2023)

On July 27, 2023, SpaceX launched the world's largest private communications satellite 'Jupiter 3' using a Falcon Heavy rocket from Launch Complex-39A of NASA's Kennedy Space Center in Florida.

An Overview of the News

- The 'Jupiter 3' satellite, developed by Maxar Technologies in Palo Alto, California, holds the record as the largest commercial communications satellite ever built.
- This upcoming launch marks the seventh mission of SpaceX's triple-booster rocket, the Falcon Heavy, which first attracted widespread attention during its debut in 2018.

About 'Jupiter 3'

- Its size would be comparable to the wingspan of a commercial airliner, measuring between 130 and 160 feet (40 to 50 m). Its larger size will enable it to double current internet capacity to 500 Gbps, significantly improving connectivity in areas with limited cable and fibre options.
- Hughes will integrate the 'Jupiter 3' into its existing satellite network, allowing HughesNet customers in the United States and Latin America to access high-speed satellite broadband at speeds of up to 100 Mbps.
- The capabilities of satellites extend far beyond regular Internet access. It will support in-flight Wi-Fi, ensuring connectivity for passengers during air travel. It will also provide maritime connectivity, allowing internet access for ships at sea.
- 'Jupiter 3' will play a key role in enhancing enterprise networks, meeting the connectivity needs of businesses across North and South America.
- Additionally, the satellite will serve as a reliable backhaul solution for mobile network operators (MNOs), ensuring smoother and more efficient data transmission within the region's mobile networks.

- One of its essential applications is providing community Wi-Fi solutions, which help bridge the digital divide and extend Internet access to disadvantaged areas in North and South America.

About NASA

- NASA was formed on July 19, 1948, under the National Aeronautics and Space Act, replacing its predecessor, the National Advisory Committee for Aeronautics (NACA).
- NASA - National Aeronautics and Space Administration
