1. India set to become 3rd largest economy in the world by 2027-28: IMF (Oct. 15, 2022)

According to the [World Economic Outlook Report 2022](#) released by the International Monetary Fund (IMF) on 11 October 2022, India is expected to become the **third largest economy in 2027-28** by overtaking Japan. Earlier [SBI](#) in its report had predicted that India will become world's 3rd largest economy by 2028-29.

India still 6th largest economy in the world

However India is still the **6th largest economy** in the world after the United Kingdom in 2021-22. The Indian Gross Domestic Product (GDP) 2021-22 was \$ 3.18 trillion while the United Kingdom GDP was \$ 3.19 trillion.

According to the IMF India will overtake the **UK in 2022-23**. India would become a \$3.47-trillion economy in 2022-23, while the UK's would be \$3.2 trillion in the same period.

Earlier, a [Bloomberg](#) report stated that India has overtaken the UK in the fourth quarter of 2021-22, basing it on IMF data. However, that comparison was made on quarterly data and not on yearly data.

Future Projection of Indian Economy

According to IMF projections, the Indian Economy will be equal to the German economy in **2025-26** and will become the **4th largest** in the world.

India's economy will not be able to achieve the \$5 trillion mark as hoped by the Finance Ministry by 2026-27 but it will be a \$4.94 trillion economy.

In **2027-28** the India economy is expected to be at the \$5.36-trillion mark, higher than Japan's at \$5.17 trillion. That year, India would become the third-largest economy.

According to the IMF, **the United States was the largest economy** in the world followed by China, Japan, Germany and the United Kingdom.
