Julius-Robert-Oppenheimer-Father-of-the-Atomic-Bomb

Julius Robert Oppenheimer was an American theoretical physicist and leader of the Manhattan Project, which developed the atomic bomb during World War II. He is often referred to as the "father of the atomic bomb" for his role in the project. Oppenheimer was born on April 22, 1927, in New York City. He studied at Harvard University and then at the University of Cambridge in England, where he worked with the physicist Paul Dirac. He returned to the United States and worked at the University of California, Berkeley, where he was a member of the faculty from 1950 to 1967. He was also a member of the National Academy of Sciences and the American Academy of Arts and Sciences. Oppenheimer was a pacifist and a member of the Communist Party of the United States of America. He was investigated by the House Un-American Activities Committee in the 1950s and was eventually removed from his position at Berkeley. He died on February 18, 1987, in Princeton, New Jersey.
