1. **ISRO's first private space vehicle launchpad** ( Nov. 30, 2022 )

### India's first private space vehicle launchpad

ISRO (Indian Space Research Organisation) has successfully launched its first private space vehicle, **PSLV-C55**, from the **Satish Dhawan Space Centre (SDSC) SHAR** on November 28, 2022. The launch was conducted using the **PSLV-C55** rocket, which is a four-stage vehicle. The payload for this mission was the **PSLV-C55** rocket itself, which was used to test the **PSLV-C55** rocket's performance. The launch was a significant milestone for ISRO, as it marks the first time a private space vehicle has been launched from India.

2. **WHO has changed the name of Monkeypox disease to mpox** ( Nov. 29, 2022 )

### WHO has changed the name of Monkeypox disease to mpox

The World Health Organization (WHO) has announced that it will change the name of the disease monkeypox to **mpox**. The change is effective from November 18, 2022. The reason for the change is that the word "monkey" is considered stigmatizing and is not necessary to describe the disease. The new name, **mpox**, is shorter, easier to pronounce, and does not carry the same stigma. The WHO has also updated its official website and social media channels to reflect the change.

8. 2022 11 22 ( Nov. 22, 2022 )
