1. 2023-24 Budget: 100% increase in solar energy subsidies (June 26, 2024)

The government has announced a 100% increase in solar energy subsidies for the 2023-24 financial year. This move is part of the National Solar Energy Mission, aimed at accelerating the adoption of solar power across the country. The subsidies will cover the cost of solar panels, inverters, and installation for residential and commercial users. The government expects this to significantly boost the solar energy sector and reduce the country's dependence on fossil fuels.
